Harbour Chair

Meet the Harbour Chair

Clean lines. Diverse, tactile materials. A sublime sit. The Harbour Chair was conceived with all these elements in mind to create the ultimate, versatile, easy-going armchair for modern spaces. Originally created by Norm Architects for MENU Space, MENU's new creative destination in Copenhagen's Nordhavn Harbour, the Harbour Chair pairs exceptional comfort with a strong profile. Finding a perfect balance between geometric and organic shapes, the shell's armrests bend outwards for maximum support, as does its high backrest, providing enveloping comfort in a slim, elegant form. The Harbour Chair can be left bare or upholstered, with four elegant base styles in solid oak or powder-coated steel inviting further personalisation. The low, ergonomic armrests not only enhance comfort, but also allow the chair to be tucked all the way under standard dining tables. This is the type of sitting experience that energises you in the morning, helps you plug in during the day, and welcomes you to unwind at night. From the kitchen to the office, the private dining room to the bustling café, the Harbour Chair effortlessly sails to any destination, becoming instantly at home – and making sure you feel the same.

About MENU

MENU is a Scandinavian design brand with a simple philosophy: to make the world better, less complicated, and a little bit nicer to wake up to. We harness the skills of top designers and craftspeople in Scandinavia and around the world to create furniture, lighting and home accessories that are clean, clever and contemporary. Our designs infuse a sense of calm through minimalist lines and natural tones, and provide high comfort and functionality to simplify and enrich modern living. What makes a space unique? What brings the people who inhabit it comfort, joy, and a sense of peace? How does one stay contemporary with timeless objects designed to endure? These are the questions we seek to answer as we expand our portfolio with new products to bring into your world. Your chosen objects will be with you for years to come. We know every decision you make is important, and we want nothing more than to bring joy, beauty, and ease to the process of designing your space. It's why we exist, and what we do best.

About Norm Architects

Founded in Copenhagen in 2008 by Jonas Bjerre-Poulsen and Kasper Rønn, Norm Architects specialise in residential architecture, commercial interiors, industrial design, photography and art direction. Today, the group regularly collaborates with MENU, helping to drive the evolution of the brand and its product offerings. Norm Architects' name reflects the group's emphasis on the importance of drawing inspiration from norms and traditions within architecture and design – particularly the Scandinavian design principles of timeless aesthetics and natural materials, and the modernist values of restraint and refinement. Guided by these principles, Norm Architects produce design that unites good materials and craftsmanship, while embodying beauty, traditions, history and, most importantly, timeless simplicity, where there is nothing more to add or take away.
