

# LEATHER

Leather is a high-quality material, with many good properties. It is easy to clean and maintain, has a high level of water- and stain resistance, a high lightfastness (7/10), and is also fire-retardant.

Our leather products are designed to get the absolute most of every piece of skin. This is achieved by using the large pieces for furniture and the smaller pieces for cushions.

## CLEANING AND MAINTENANCE

- Wash regularly with a damp cloth
- Maintain with a cleaner specifically for leather
- Over time, the EPS filling of the leather beanbags may flatten and extra filling can be necessary. Shop EPS beads [here](#)

## PRACTICAL INFO

Name: SIERRA

Composition: Grain leather from overseas

Treatment: Chrome tanned, produced without PCP and CFC

Abrasion resistance: 50.000 Martindale

Rubbing resistance: 3-5

Lightfastness: 7

FR: UNI EN ISO 1021-1/2, BS 5852 1990 sec. 4 NI/O-1, California T.B. 117
