

WOOL

Wool is a high-quality material, with many good properties. It is easy to clean and maintain, has a high level of water- and stain resistance, and is also fire-retardant.

All wool products have a removable cover, which makes cleaning easy. It also makes it possible to replace only the cover if you want to switch to another color or materials.

The inner bag in the wool products has an opening, which makes it possible to adjust the filling to fit your specific comfort need,

CLEANING AND MAINTENANCE
